

EA and BPMN

This course is designed for business analysts who wish to learn BPMN notation and create hierarchical BPMN models in Enterprise Architect. Delegates are taught how to create BPMN business process and collaboration diagrams within Enterprise Architect. This course is highly practical with many hands-on exercises.

- Location:** Webinar
- Time:** 09.30 to 16.30 GMT
- Cost:** £250 + VAT per delegate (7 delegates maximum)
- Prerequisites:** No prior knowledge of BPMN is required. Basic Enterprise Architect experience is expected. If new to Enterprise Architect consider attending our “EA Fundamentals” course first.
- Equipment:**
-  To attend this webinar delegates require a PC or laptop running Enterprise Architect with an Internet connection (a headset can be helpful). If you wish to test your environment join a test WebEx meeting: <https://www.webex.com/test-meeting.html>
 -  A trial version of Enterprise Architect is fine for training and can be downloaded from Sparx Systems website: www.sparxsystems.com/products/ea/trial.html. It is also helpful to have a mouse as this makes creating diagrams much easier.
- Course Style:** 50% theory, 50% practical
Each module is accompanied by hands-on exercises to allow delegates to apply the theory and become confident using BPMN and Enterprise Architect.
- Delegate Handouts:** Each delegate receives a booklet containing all the course slides and comprehensive theory notes which form excellent reference material. Booklets also contain exercises and suggested solutions. Following successful completion of the course each delegate receives a certificate.
