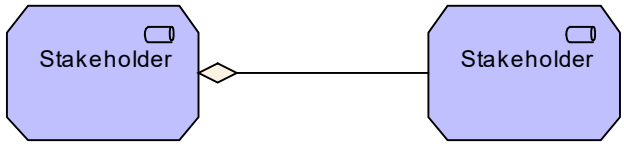
Summary Notation: ArchiMate 3 Motivation

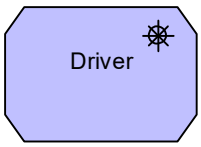
Hippo Software
www.hippo-software.co.uk

Notation based on The Open Group ArchiMate 3.0 Specification

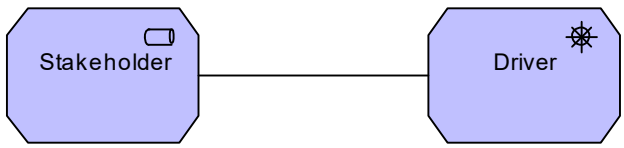
A **Stakeholder** represents an interested party who is influential in architectural decisions.



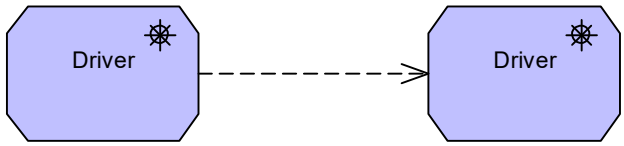
A stakeholder can be an **aggregate** that contains 1 or more other stakeholders.



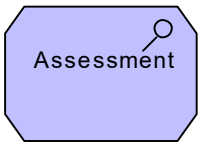
A **Driver** represents a motivation for change in an organisation.



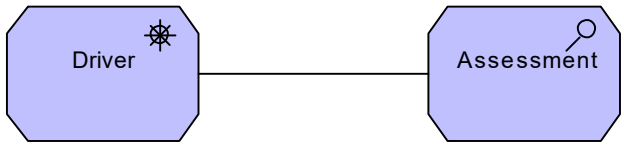
A stakeholder is **associated** with 1 or more drivers.



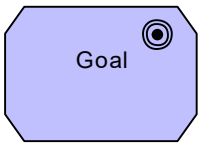
An external driver **influences** an internal driver.



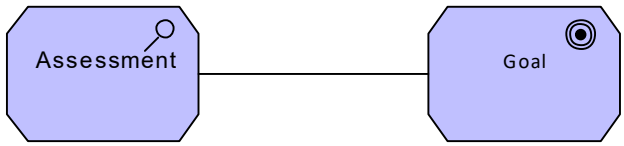
An **Assessment** documents strengths, weaknesses, opportunities and threats.



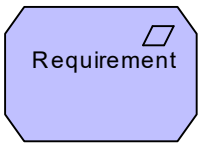
A driver is **associated** with 1 or more assessments.



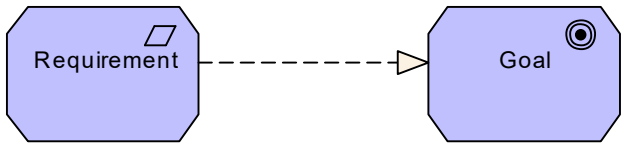
A **Goal** defines an objective to address an assessment.



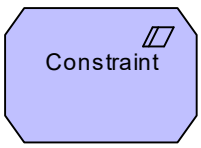
An assessment is **associated** with 1 or more goals.



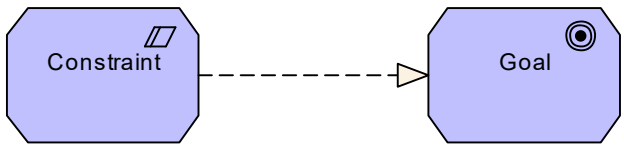
A **Requirement** specifies a change needed to implement a goal.



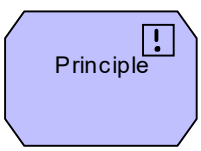
An requirement **realizes** (implements) a goal.



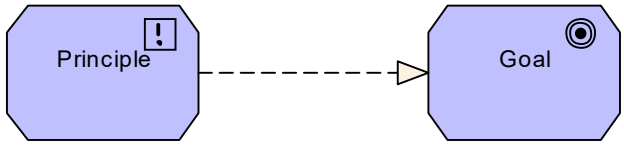
A **Constraint** indicates a restriction on how goals can be addressed.



A constraint **realizes** (restricts the implementation of) a goal.



A **Principle** defines a standard or policy to guide how goals are implemented.



A principle **realizes** (guides the implementation of) a goal.
