

EA for Architecture and Strategy

This course is for architects who are new to Enterprise Architect. It covers all of ArchiMate – business, application and technology layers as well as motivation, strategy, physical and implementation & migration elements. It allows delegates to create standard ArchiMate viewpoint diagrams within Enterprise Architect.

Duration: 3 days

Prerequisites: No prior Enterprise Architect experience is required.
A background in enterprise architecture and ArchiMate notation is helpful.

Equipment:

For on-site delivery the customer should provide a suitable training room with a screen or projector to connect to our trainer's laptop and a whiteboard or flipchart. All delegates require a PC or laptop running Enterprise Architect.

For webinar delivery delegates require a PC or laptop running Enterprise Architect with an Internet connection (a headset can be helpful). If you wish to test your environment join a test WebEx meeting: www.webex.com/test-meeting.html

A trial version of Enterprise Architect is fine for training and can be downloaded from Sparx Systems website: www.sparxsystems.com/products/ea/trial.html. It is also helpful to have a mouse as this makes creating diagrams much easier.

Course Style: 45% theory, 55% practical.
Each module is accompanied by a hands-on exercise to allow delegates to apply the theory and become confident using Enterprise Architect.

Delegate Handouts: Each delegate receives a folder containing all the course slides and comprehensive theory notes which form excellent reference material. Folders also contain exercises and suggested solutions. Following successful completion of the course each delegate receives a certificate.
